

E22-106

EMC

EMC Legato Certified Availability Administrator (LCAA)

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=E22-106>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your E22-106 exam in first attempt, but also you can get a high score to acquire EMC certification.

If you use pass4sureofficial E22-106 Certification questions and answers, you will experience actual E22-106 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our EMC exam prep covers over 95% of the questions and answers that may be appeared in your E22-106 exam. Every point from pass4sure E22-106 PDF, E22-106 review will help you take EMC E22-106 exam much easier and become EMC certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial EMC E22-106 course:

- * Up-to-Date EMC E22-106 questions taken from the real exam.*
- * 100% correct EMC E22-106 answers you simply can't find in other E22-106 courses.*
- * All of our tests are easy to download. Your file will be saved as a E22-106 PDF.*
- * EMC E22-106 brain dump free content featuring the real E22-106 test questions.*

EMC E22-106 certification exam is of core importance both in your Professional life and EMC certification path. With EMC certification you can get a good job easily in the market and get on your path for success. Professionals who passed EMC E22-106 exam training are an absolute favorite in the industry. You will pass EMC E22-106 certification test and career opportunities will be open for you.

Question: 1

Which is a valid IP address for private non-routed network use?

- A - 37.16.256.4
- B - 117.24.103.40
- C - 127.0.0.1
- D - 192.168.7.69

Answer: D

Question: 2

A company has a mission-critical application that needs to be protected by AAM. It is also necessary for a scheduled task, or cron job to be run on the node running the application. A rule is created to discover which node is hosting the application and then to launch the cron job on that node. Which type of trigger is associated with this rule?

- A - Scheduled trigger
- B - Time-based trigger
- C - On-demand trigger
- D - Sensor-based trigger

Answer: A

Question: 3

Why would AAM report a failed state for a process when the user still sees the application running?

- A - The existence test is not written properly.
- B - The existence test is reporting a value of true.
- C - The response test is not checking for multiple processes.
- D - The response test is returning a process state of No Response.

Answer: A

Question: 4

What happens to a Resource Group, using the default settings, when a managed process goes into a failed state?

- A - Three attempts are made to restart the managed process.
- B - The Resource Group is immediately relocated to another node.
- C - The existence test is performed to see if the process has actually failed.
- D - The isolation script is run to determine if the Resource Group is isolated.

Answer: A

Question: 5

You have a Resource Group defined for a two-node Domain on nodes A and B. You want to demonstrate a failover. The Resource Group is online on node A. All of the network cables are disconnected on node A to initiate a failover. The Resource Group remains online on node A. Node B takes over the Resource Group. Which condition caused this to happen?

- A - No Isolation Detection addresses were configured on node A.
- B - The verification line was configured improperly so the node did not transition to the failed state.

- C - The Resource Group algorithm prevents relocation when heartbeats are not received from any other nodes.
- D - The Resource Group's objects transitioned to the unknown state so it could not be started on the other node.
- E - One of the objects in the Resource Group was a shared disk data source and the SCSI reset could not be sent over the network.

Answer: A

Question: 6

Your process or service is stuck in the stopping state. Which two statements describe potential sources of the problem? (Choose two.)

- A - The response test is not written correctly.
- B - The existence test is not working correctly.
- C - The testing interval for monitoring is too low.
- D - The testing interval for monitoring is too high.
- E - There is something wrong with the stop command.

Answer: B, E

Question: 7

By default, AAM port values are 8042 to 8045. Which command should you use to verify if these ports are available?

- A - nbtstat-a
- B - netstat-a
- C - purtstat-a
- D - nslookup -a

Answer: B

Question: 8

An AAM domain uses two domain lines. What happens if you change the IP address scheme of domain line A?

- A - AAM continues to use domain line B as a single domain line.
- B - AAM can no longer use either line as a domain line and registers an error.
- C - AAM immediately recognizes the change and automatically reassigns the first line as domain line A.
- D - AAM immediately detects the change and deletes and recreates all new domain lines using the two new IP addresses for communication.

Answer: A

Question: 9

Which two statements about domain networks are true? (Choose two.)

- A - If a domain network fails, heartbeating continues over the verification network.
- B - Heartbeat communication within the domain takes place over the domain network.
- C - Network interfaces used for domain heartbeat communication should be managed by AAM.
- D - The domain network can be used for communication with and between managed processes.

Answer: B, D

Question: 10

Node alias names must _____ (Choose two.)

- A - B unique
- B - B listed in DNS
- C - B fewer than 16 characters
- D - Disable NetBIOS over TCP/IP
- E - B assigned to a Resource Group

Answer: A, C

Question: 11

A managed IP address can be assigned on NodeA, but not NodeB. What are three potential reasons for this conditions?

- A - NodeA has not unassigned or properly released the managed IP address
- B - NodeB does not have a Network Interface Card (NIC) on the designed subnet
- C - The target Network Interface Card (NIC) on NodeB is not configured or plumbed
- D - NodeB does not have a usable Network Interface Card (NIC) in the designated NIC group
- E - All of NodeB's usable Network Interface Cards (NICs) are already hosting a managed IP address so no available NICs exist

Answer: A, B, D

Question: 12

Which statement describes the functionality of an AAM Sensor?

- A - A Sensor returns the value of the data point to a trigger.
- B - A Sensor fires an associated rule when the value of the data point changes.
- C - A Sensor fires an associated trigger when the value of the data point changes.
- D - A Sensor senses changes in the value of a data point and submits those changes to its associated rule.

Answer: A

Question: 13

A three-node domain is configured with each of the nodes connected to two networks. A network cable attached to node A's Network Interface Card (NIC) is accidentally detached. Later that evening, the maintenance crew unplugs power to the hub on node A's remaining working network. Which statement is true?

- A - The node is considered isolated.
- B - Nodes B and C will report node A as shut down.
- C - The resources running on node A are taken offline.
- D - When the network connection is re-established, node A will determine that its Resource Group objects have changed to a failed state.

Answer: A

Question: 14

How does AAM check the configured network path test IP addresses?

- A - Serially
- B - Randomly
- C - Numerically

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
