If you use pass4sureofficial 2B0-104 Certification questions and answers, you will experience actual 2B0-104 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Enterasys exam prep covers over 95% of the questions and answers that may be appeared in your 2B0-104 exam. Every point from pass4sure 2B0-104 PDF, 2B0-104 review will help you take Enterasys 2B0-104 exam much easier and become Enterasys certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Enterasys 2B0-104 course:

- * Up-to-Date Enterasys 2B0-104 questions taken from the real exam.*
- * 100% correct Enterasys 2B0-104 answers you simply can't find in other 2B0-104 courses.*
- * All of our tests are easy to download. Your file will be saved as a 2B0-104 PDF.*
- * Enterasys 2B0-104 brain dump free content featuring the real 2B0-104 test questions.*

Enterasys 2B0-104 certification exam is of core importance both in your Professional life and Enterasys certification path. With Enterasys certification you can get a good job easily in the market and get on your path for success. Professionals who passed Enterasys 2B0-104 exam training are an absolute favorite in the industry. You will pass Enterasys 2B0-104 certification test and career opportunities will be open for you.

QUESTION NO: 1

An Acceptable Use Policy for the network should define:

- A. Which types of traffic trusted users only are allowed to generate on the network
- B. Which types of traffic untrusted users only are allowed to generate on the network
- C. Which types of traffic trusted and untrusted users are allowed to generate on the network
- D. Which types of traffic guest users only are allowed to generate on the network

Answer: C

QUESTION NO: 2

A new virus has been identified on the Internet causing an infected system to listen to TCP port X for allowing remote connections to the infected device. If a network administrator desires to prevent infected devices from being further exploited within the enterprise network, the network administrator should configure and enforce policy for infected devices to the Active Edge of the network that:

- A. Discards traffic destined to TCP port X
- B. Discards traffic sourced from TCP port X
- C. Prioritizes traffic destined or sourced to TCP port X to a low priority
- D. Rate limit traffic destined or sourced to TCP port X

Answer: B

QUESTION NO: 3

Which of the following services, as defined by demo.pmd in NetSight Policy Manager, reduces network congestion by removing legacy protocols from the network such as IPX?

- A. Deny Unsupported Protocol Access service
- B. Deny Spoofing & other Administrative Protocols service
- C. Threat Management service
- D. Limit Exposure to DoS Attacks service

Answer: A

QUESTION NO: 4

In a multi-vendor environment where 3rd party devices are located at the edge of the network and are not policy-capable, installing a policy-capable device in the distribution layer:

- A. Protects the network core from internally sourced attacks
- B. Protects the server farm from internally sourced attacks
- C. Secures other access layer segments connected through the policy-capable distribution layer device
- D. All of the above

Answer: D

QUESTION NO: 5

In a multi-vendor environment, where is the placement of a policy capable device most effective in discarding malicious traffic and protecting the entire network:

- A. At the access layer edge
- B. At the distribution layer
- C. In the DMZ
- D. In the core
