

000-484

IBM

Enterprise Connectivity with J2EE V1.3

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-484>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-484 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-484 Certification questions and answers, you will experience actual 000-484 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-484 exam. Every point from pass4sure 000-484 PDF, 000-484 review will help you take IBM 000-484 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-484 course:

- * Up-to-Date IBM 000-484 questions taken from the real exam.
- * 100% correct IBM 000-484 answers you simply can't find in other 000-484 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-484 PDF.
- * IBM 000-484 brain dump free content featuring the real 000-484 test questions.

IBM 000-484 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-484 exam training are an absolute favorite in the industry. You will pass IBM 000-484 certification test and career opportunities will be open for you.

Question: 1

A developer successfully creates and tests a stateful Session Bean. Following deployment, intermittent NullPointerExceptions begin to occur, particularly when the server is heavily loaded. Which bean method is MOST likely to be related to the problem?

- A. setSessionContext
- B. ejbCreate
- C. ejbPassivate
- D. beforeCompletion
- E. ejbLoad

Answer: C

Question: 2

A developer implements a BMP entity bean which uses a relational database. Identify the lifecycle methods that involve database access.

- A. ejbCreate()
- B. ejbPostCreate()
- C. ejbActivate()
- D. ejbPassivate()
- E. ejbRemove()

Answer: A, E

Question: 3

An EJB that is deployed with container-manager transaction contains a business method. This method performs an operation that potentially throws a NullPointerException. If this occurs, the bean cannot recover and should rollback its transaction. What is the BEST way to implement this scenario?

- A. Catch the NullPointerException exception, then throw an application exception. The container will rollback the transaction automatically.
- B. Catch the NullPointerException exception, then throw an application exception that wraps the original exception. The container will rollback the transaction automatically.
- C. Catch the NullPointerException exception, call setRollbackOnly(), thus forcing a rollback of the transaction, then throw an application exception.
- D. Do nothing and let the NullPointerException propagate to the container. The container will rollback the transaction automatically.

Answer: C

Question: 4

Which of the following are TRUE regarding ejbPostCreate() methods?

- A. Only entity beans have ejbPostCreate() methods.
- B. ejbPostCreate() method signatures must match ejbCreate() method signatures.
- C. ejbPostCreate() methods are optional.
- D. Corresponding postCreate() methods exist in the bean's home interface.
- E. ejbPostCreate() is called by the EJB container following creation of the bean's EJBObject.

Answer: A, B, E

Question: 5

Which of the following represents the order in which a stateful session bean's methods might get executed, according to its life cycle?

- A. `ejbPassivate()`, `setSessionContext()`, `ejbActivate()`, `ejbRemove()`.
- B. `ejbActivate()`, `setSessionContext()`, `ejbPassivate()`, `ejbRemove()`.
- C. `setSessionContext()`, `ejbActivate()`, `ejbPassivate()`, `ejbRemove()`.
- D. `setSessionContext()`, `ejbPassivate()`, `ejbActivate()`, `ejbRemove()`.

Answer: D

Question: 6

An EJB is required to hold a customer's address information. This information must be made available to future customer transactions. The bean must be deployable to any EJB server. The exact server runtime configuration is unknown. Which bean type BEST suits these requirements?

- A. A stateless session bean.
- B. A stateful session bean.
- C. A BMP entity bean.
- D. A CMP entity bean.
- E. A message-driven bean.

Answer: D

Question: 7

The remote home interface for an EJB only contains a single method. The signature of this method is `create(int xyz)`. What type of bean MUST it be?

- A. stateless session bean
- B. stateful session bean
- C. BMP entity bean
- D. CMP entity bean
- E. message-driven bean

Answer: B

Question: 8

Two entity beans share a bidirectional, container-managed relationship (CMR). What statements are TRUE regarding these beans? .

- A. None of the entity beans need to have a local interface.
- B. Only one of the two entity beans MUST have a local interface; the other bean can have either a remote or a local interface.
- C. Both entity beans MUST have local interfaces.
- D. None of the entity beans have to be container-managed-persistence (CMP) beans.
- E. Only one of the two entity beans MUST be a container-managed-persistence (CMP) bean. The other bean can be either a container-managed (CMP) or bean-managed (BMP) bean.
- F. Both entity beans must be container-managed persistence (CMP) beans.

Answer: C, F

Question: 9

Which of the following are TRUE about primary keys and entity beans?

- A. All entity beans must have a `findByPrimaryKey(primaryKey)` method implemented in the bean class.

- B. All entity beans must have a `findByPrimaryKey(primaryKey)` method declared in each home interface.
- C. All primary key classes must be legal value types in RMI-IIOP.
- D. A custom primary key class must be defined.
- E. Entity beans must be located using the `findByPrimaryKey(primaryKey)` method.

Answer: B, C

Question: 10

An EJB is required to model the catalog object of a "J2EE Book Store". The catalog object represents different categories and products and provides browsing and searching services to its clients. Also, it only reads catalog data from the underlying database. Which of the following designs BEST suits the requirement?

- A. stateless session bean with Data Access Object (DAO)
- B. stateful session bean with Data Access Object (DAO)
- C. BMP entity bean with DAO Data Access Object (DAO)
- D. CMP entity bean

Answer: A

Question: 11

An EJB is required to process order fulfillment. No immediate reply is required by the client, but a confirmation email is expected instead when the order is fulfilled. Which bean type BEST suits the requirements?

- A. stateless session bean
- B. stateful session bean
- C. BMP entity bean
- D. CMP entity bean
- E. message-driven bean

Answer: E

Question: 12

A developer sets up a topic with a message-driven bean. During testing, the developer notes that messages are lost when a client disconnects. What possible changes will ensure that all unexpired messages are delivered when a client has been disconnected?

- A. Use a queue instead of a topic.
- B. Code the `onMessage()` method in the client code so that no acknowledgement is sent until after the messages have completed processing.
- C. Specify `<subscription-durability>Durable</subscription-durability>` in the deployment descriptor for the topic.
- D. Design the client code to implement the `javax.jms.MessageListener` interface.

Answer: A, C

Question: 13

An EJB client initializes and begins a transaction. It then invokes a bean business method. The bean uses container-managed transaction demarcation. The business method executes within the scope of the client supplied transaction. Which of the following are possible values for the bean method's transaction attribute?

- A. `NotSupported`

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
