

# HP0-210

## HP

### *HP Mission Critical Technical Level 1 Certification*

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=HP0-210>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your HP0-210 exam in first attempt, but also you can get a high score to acquire HP certification.

If you use pass4sureofficial HP0-210 Certification questions and answers, you will experience actual HP0-210 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our HP exam prep covers over 95% of the questions and answers that may be appeared in your HP0-210 exam. Every point from pass4sure HP0-210 PDF, HP0-210 review will help you take HP HP0-210 exam much easier and become HP certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial HP HP0-210 course:

- \* Up-to-Date HP HP0-210 questions taken from the real exam.
- \* 100% correct HP HP0-210 answers you simply can't find in other HP0-210 courses.
- \* All of our tests are easy to download. Your file will be saved as a HP0-210 PDF.
- \* HP HP0-210 brain dump free content featuring the real HP0-210 test questions.

HP HP0-210 certification exam is of core importance both in your Professional life and HP certification path. With HP certification you can get a good job easily in the market and get on your path for success. Professionals who passed HP HP0-210 exam training are an absolute favorite in the industry. You will pass HP HP0-210 certification test and career opportunities will be open for you.

**QUESTION: 1**

When updating DISK MODULE firmware in a dual storage processor Nike disk array, what do you need to do before starting the download? You must disable:

- A. either of the storage processors, regardless of ownership.
- B. the BBU.
- C. autotranspass.
- D. the storage processor that IS the owner of the disk modules being updated.

**Answer: A**

**QUESTION: 2**

The customer is running ServiceGuard. He has several different models and wants to know if he can have them in the same cluster. There are two T500s, four K460s, and one I70. How do you respond to the customer's request?

- A. All of the models can be in the same cluster.
- B. Only like models can be in the same cluster.
- C. Have the T500s in one cluster and K460s with the I70 in the second cluster.
- D. Have the T500s in one cluster, K460s in the another cluster, and the I70 cannot be used.

**Answer: A**

**QUESTION: 3**

The V-Class server must be in which mode prior to running flash based Diagnostics?

- A. standalone
- B. idle
- C. single-user
- D. scan **Answer: A**

**QUESTION: 4**

On a 3 server MC/ServiceGuard configuration, what must be considered on the server that uses the V (SCSI) cable?

- A. The terminator must be removed from the center SCSI card.
- B. The address of all the SCSI cards must be set to 7.

- C. Only nuke peripherals can be connected.
- D. Each controller must have direct connection to external enclosures.

**Answer:** A

**QUESTION: 5**

You are installing a fast/wide SCSI card into a K460. The customer has asked you to also install two racks of 5 fast/wide disk drives each. What is the addressing priority scheme that should be used?

- A. 15, 14, 13, 12, 11, 10, 9, 8, 7, 6
- B. 5, 4, 3, 2, 1, 0, 15, 14, 13, 12
- C. 0, 1, 2, 3, 4, 5, 6, 7, 8, 9
- D. 15, 0, 14, 1, 13, 2, 12, 3, 11, 4

**Answer:** B

**QUESTION: 6**

The major feature of a A3312AZ (Jamaica) hot pluggable disk/tape is the ability to hot-swap mechanisms without bringing down any part of the system. Hot pluggable means: insertion and removal with power applied to:

- A. all mechanisms, but all system activity to this device must be halted first.
- B. all mechanisms (SE & FW) and no disruption to any system activity.
- C. only differential disk mechanisms, but you must have exclusive access to the failed device.
- D. only tape drives, but all system activity must be halted first.

**Answer:** C

**QUESTION: 7**

You have been called on site to repair a LVM root disc that will not boot to ISL. You have determined that the problem is not hardware related. You have booted the 'Support CD'. Which of the following recovery options would be your first choice?

- A. Rebuild the bootlif and install all files required to boot and recover HP-UX on the root file system.
- B. Do not rebuild the bootlif, but install files required to boot and recover HP-UX on the root file

system.

C. Rebuild only the bootlif.

D. Replace only the kernel on the root file system.

**Answer: C**

**QUESTION: 8**

Your customer complains pkg1 will not restart since you troubleshoot a disc in vgpkg1. (Click the exhibit button to view the image)

```
d320_1:/ # cmviewcl -v
```

```
CLUSTER  STATUS
cluster1  up
```

```
NODE      STATUS  STATE          NODE      STATUS  STATE
d320_1    up      running       d320_2    up      running
```

```
Network_Parameters:
```

```
INTERFACE STATUS  PATH      NAME
PRIMARY    up      8/16/6    lan0
STANDBY    up      8/20/5/8  lan2
PRIMARY    up      8/20/5/1  lan1
```

```
Network_Parameters:
```

```
INTERFACE STATUS  PATH      NAME
PRIMARY    up      8/16/6    lan1
PRIMARY    up      8/20/5/1  lan2
STANDBY    up      8/20/5/8  lan0
```

```
PACKAGE STATUS  STATE  PKG_SWITCH  NODE
pkg1     down   halted  disabled    unowned
```

```
Policy_Parameters:
```

```
POLICY_NAME      CONFIGURED_VALUE
Failover         configured_node
Failback         manual
```

```
Script_Parameters:
```

```
ITEM      STATUS  NODE_NAME  NAME
Subnet    up      d320_1     192.6.100.0
Subnet    up      d320_2     192.6.100.0
```

```
Node_Switching_Parameters:
```

```
NODE_TYPE STATUS  SWITCHING  NAME
Primary    up      disabled   d320_1
Alternate  up      disabled   d320_2
```

You look in the package log file and see:

```
'vgchange: Activation mode requested for the volume group '/dev/vgpkg1' conflicts with configured mode.'
```

What are the possible reasons and solutions?

A. A physical volume may be missing, have a look at vgdisplay output.

B. vgpkg1 has been unlocked from cluster mode, need to lock manually.

C. vgpkg1 is currently active on another node, do a vgdisplay on all nodes.

D. vgpkg1 has been removed from the cluster configuration, need to cmapplyconf.

## Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
