Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your HP2-061 exam in first attempt, but also you can get a high score to acquire HP certification.

If you use pass4sureofficial HP2-061 Certification questions and answers, you will experience actual HP2-061 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our HP exam prep covers over 95% of the questions and answers that may be appeared in your HP2-061 exam. Every point from pass4sure HP2-061 PDF, HP2-061 review will help you take HP HP2-061 exam much easier and become HP certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial HP HP2-061 course:

- \* Up-to-Date HP HP2-061 questions taken from the real exam.
- \* 100% correct HP HP2-061 answers you simply can't find in other HP2-061 courses.
- \* All of our tests are easy to download. Your file will be saved as a HP2-061 PDF.
- \* HP HP2-061 brain dump free content featuring the real HP2-061 test questions.

HP HP2-061 certification exam is of core importance both in your Professional life and HP certification path. With HP certification you can get a good job easily in the market and get on your path for success. Professionals who passed HP HP2-061 exam training are an absolute favorite in the industry. You will pass HP HP2-061 certification test and career opportunities will be open for you.

**QUESTION 1**

What are special requirements for Online Spare Memory? Select TWO.

- A. The second populated bank is used as the spare memory bank.
- B. Online spare memory must be configured in the ROM-Based Setup Utility (RBSU).
- C. The DIMMs in the spare bank must be the same size or larger than those in the other banks.
- D. When online spare memory is present, the spare memory bank is counted during the power-on self-test (POST) and is added to the system memory count reported to the operating system.

Answer: B, C

Explanation:

Configuring online spare memory

Before you configure an online spare DIMM, HP recommends that you perform the following steps:

1. Test the new memory.
  - a. From the Advanced Options screen in the RBSU, disable POST speedup.
  - b. From the Advanced Memory Protection screen, disable Online Spare with ECC support.
  - c. Restart the system to begin testing the memory. This may take a few minutes, depending on how much memory is installed in the system.
2. Perform these steps after the memory has been tested.
  - a. Enable POST speedup for faster system starts.
  - b. Power down the system.
  - c. Verify that bank C is populated with memory no smaller than either bank A or B.
3. Configure the online spare.
  - a. Power on the server. Online spare memory is disabled by default; therefore, all the memory is initially counted and configured as available primary memory.
  - b. At the prompt, press F9 to enter RBSU.
  - c. From the Advanced Memory Protection screen, enable Online Spare with ECC support. Press ESC twice to return to the main RBSU menu.
  - d. Press F10 to exit RBSU and restart your server. When your server restarts, it will enable online spare memory and display the following message: "xxxxMB System Memory and yyyyMB memory reserved for Online Spare".

**QUESTION 2**

Which processor currently uses 64-bit x86-based architecture?

- A. Itanium
- B. Pentium IV
- C. AMD Opteron
- D. Pentium III Xeon

Answer: A

---

**QUESTION 3**

What is the minimum number of drives needed in RAID ADG?

- A. 2
- B. 3
- C. 4
- D. 8

Answer: A

---

**QUESTION 4**

What is the maximum number of P-class Blade Server Enclosures supported by one Scalable Bus Bar?

- A. 2
- B. 3
- C. 5
- D. 6

Answer: D

---

**QUESTION 5**

What are features of HP Systems Insight Manager? Select FOUR.

- A. device discovery
- B. extended integration
- C. fundamental integration
- D. easy and rapid installation
- E. secure remote management
- F. web browser and command-line interface

Answer: A, B, D, E

---

**QUESTION 6**

What are properties of Advanced Data Guarding? Select TWO.

- A. It is recommended for up to 14 drives.
- B. It protects against a ROM failure or corruption.
- C. It protects against two simultaneous drive failures.
- D. It allocates two sets of parity data across the drives and allows simultaneous write operations.
- E. It allocates half of the drive to data and the other half to mirrored data, providing two copies of every file.

## HP2-061

Answer: C, D

Explanation:

Only select Smart Array controllers offer HP Advanced Data Guarding (RAID ADG), which offers:

- ? Higher fault tolerance than RAID 5
- ? Lower implementation costs than RAID 1+0
- ? Greater usable capacity per U than RAID 1

When using the HP patented RAID ADG technology, you can safely deploy large-capacity hard drives and create large storage volumes. RAID ADG is a proprietary version of RAID 6 and it is thus frequently called RAID 6.

RAID ADG protects data from multiple drive failures and is able to withstand two simultaneous hard drive failures without data loss or downtime.

RAID ADG uses two sets of parity striped across the disks. This method provides protection for an array with up to 56 drives and requires only two drives to store the parity information. To implement RAID ADG, a minimum of four drives is required. Although RAID ADG provides the dual advantages of increased fault tolerance and high capacity, it does so at the cost of performance, which is less than that of other RAID levels. The RAID ADG performance equals RAID 5 performance when reading data, but it is slower when writing data because of the extra parity data.

### **QUESTION 7**

Which statements are true regarding PCI-X technology? Select TWO.

- A. In a PCI-X system the speed is determined by the fastest device.
- B. Conventional PCI adapters can operate in PCI-X systems and vice versa.
- C. A PCI-X adapter placed on a conventional PCI bus is not limited to conventional PCI speeds.
- D. PCI-X is forward and backward compatible with PCI 2.2 systems at the system, device driver and adapter levels.

Answer: A, B

### **QUESTION 8**

Which Remote Management offering allows graphic and text virtual console?

- A. iLO 2
- B. RILOE II
- C. iLO Advanced
- D. Lights-Out 100

Answer: B

---

### **QUESTION 9**

What are the two essential building blocks of modular PDUs? Select TWO.

## HP2-061

- A. control unit
- B. extension bars
- C. SNMP/serial card
- D. extended runtime module
- E. 1U/0U mounting brackets

Answer: C, E

### **QUESTION 10**

What advantage does Direct Attached Storage (DAS) have over a Storage Area Network (SAN)?

- A. easy deployment
- B. sufficient use of resources
- C. server based management model
- D. easily shared resources across multiple servers

Answer: A

Explanation:

DAS offers the easiest way to deploy incremental amounts of storage as needed without extensive upfront planning.

Because RAID inside the server is becoming less expensive, DAS is growing in popularity. Currently, more than 70% of all deployed storage is DAS.

Smart Array controllers in a DAS configuration provide the ideal platform for high-performance applications such as databases, email and messaging, and other applications that benefit from high I/O performance.

Advantages of the DAS storage solution include:

- ? High performance
- ? Easy deployment
- ? Relatively inexpensive to acquire, maintain, and expand
- ? Fast server-to-storage data transfer
- ? Easy migration to SAN solutions

Although many customers currently have separate storage systems with storage management software products that are connected to individual servers, this strategy produces islands of data dispersed throughout a distributed IT environment.

Disadvantages of the DAS storage solution include:

- ? Inefficient use of resources
- ? Unnecessarily duplicated equipment
- ? Server-based management model

IT infrastructures need speed and flexibility to adapt to dynamic markets. The HP approach to delivering DAS storage enables a business to become more competitive based on these features:

- ? Physical resources - Serve as highly available data repositories
- ? Virtualization capabilities - Simplify storage management and extend the span of

management of physical storage resources

? Resource-level storage management capabilities - Serve to configure, provision, control, and maintain storage

**QUESTION 11**

What are benefits of Serial ATA (SATA) drives? Select TWO.

- A. highest reliability
- B. highest capacity
- C. lowest price per GB
- D. highest performance
- E. medium to heavy read/write operations

Answer: C, D

---

**QUESTION 12**
