IBM

High-End Disk Solutions for Open Systems Version 1

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-206>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-206 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-206 Certification questions and answers, you will experience actual 000-206 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-206 exam. Every point from pass4sure 000-206 PDF, 000-206 review will help you take IBM 000-206 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-206 course:

- * Up-to-Date IBM 000-206 questions taken from the real exam.
- * 100% correct IBM 000-206 answers you simply can't find in other 000-206 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-206 PDF.
- * IBM 000-206 brain dump free content featuring the real 000-206 test questions.

IBM 000-206 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-206 exam training are an absolute favorite in the industry. You will pass IBM 000-206 certification test and career opportunities will be open for you.

Question: 1

A customer has purchased three IBM System Storage DS8300 systems and would like to have their SAN and storage administrator trained. The customer is worried about having much of their staff out of the office at the same time attending courses. Which training alternative provides the necessary training with the least impact?

- A. Purchase the training CD for the disk subsystem and have the staff do self-paced training
- B. Have the IBM Service Support Representative perform the training
- C. Contact IBM Education Services for an onsite training class
- D. Send one person at a time to an IBM training session

Answer: C

Question: 2

A company has acquired another company and is consolidating data centers. During the consolidation, half of the users of a business-critical application lost access. The users who maintained access experienced slow performance. What is the first action the SAN/storage administrator should take to determine the source of the problem?

- A. Review SAN configuration, connectivity, and zoning
- B. Review application parameters for contention or tuning problems
- C. Use internal disk monitoring tools to determine the problem source
- D. Check the disk parameters in the OS setup on the systems

Answer: A

Question: 3

A customer wants to collect performance data from a newly installed IBM System Storage DS8300 to determine if the system meets expected benchmarks using their application test data. Which tool best gathers the performance data?

- A. IBM DS Storage Manager
- B. IBM Tivoli Storage Resource Manager
- C. IBM TotalStorage Productivity Center for Disk
- D. IBM TotalStorage Productivity Center for Data

Answer: C

Question: 4

A customer SAN environment has undergone significant growth over the past two years. They have also suffered a high turnover rate with administrative personnel. The customer has asked a storage specialist for help in documenting and understanding their changing SAN environment. The ability to make configuration changes to devices would be a plus. Which tool should the storage specialist suggest?

- A. Visio
- B. TPC Basic Edition
- C. IBM Tivoli NetView
- D. Fabric Manager

Answer: B

Question: 5

A customer recently installed new SAN with an IBM System Storage DS8300 and several open systems servers to address a need for storage consolidation and still provide good response

time. They have asked the Business Partner technical representative for the most complete IBM product that would allow them to do performance reporting of the new SAN environment. What is the best solution?

- A. Tivoli Storage Manager
- B. Total Productivity Productivity Center for Disk
- C. Total Productivity Center Basic Edition
- D. Total Storage Productivity Center Standard Edition

Answer: D

Question: 6

A customer using an IBM System Storage DS8300 is facing performance problems. After the analysis by the technical specialist, the diagnosis indicates that the cache hits may be improved by a cache upgrade. How can the system be monitored in order to check the benefits of the cache upgrade?

- A. Using the "vmstat" command on the AIX servers connected via SAN to the DS8300 system
- B. Looking at the number of I/O managed by the DS8300 system
- C. Reading the performance reports via TotalStorage Productivity Center for Disk
- D. Generating reports using the TotalStorage Expert

Answer: C

Question: 7

What is one reason the customer should install IBM System Storage DS8000 Virtual Private Network (VPN) technology for the Call Home function?

- A. To avoid using a more expensive dial-up modem
- B. To load new licensed internal code
- C. To achieve more efficient and faster problem resolution
- D. To enable capacity on demand

Answer: C

Question: 8

System Storage DS8000 system has improved users' response times for an IBM System p server running SAP. How can the improvement be verified?

- A. Check the output of the vmstat command on AIX
- B. Check the performance reports via TotalStorage Productivity Center for Data
- C. Check the performance reports via TotalStorage Productivity Center for Disk
- D. Check the improvement through the TotalStorage Expert report

Answer: C

Question: 9

A customer has requested an IBM System Storage DS8300 system for a new Exchange 2003 email solution to meet the following requirements: - 20% yearly growth - 25,000 mail boxes - approximately 50/50 mix of read/write operations The storage specialist has used Capacity Magic to calculate a base configuration of 46.7 TB raw capacity, 64 GB cache, and 24 ports for the DS8300. The storage specialist has been asked to model this configuration using the expected workload to verify that it is a viable solution. What is needed to start modeling?

- A. 73 GB 15k rpm drives

- B. The amount of IOPS per mail box
- C. The number of servers running Exchange
- D. The Jetstress tool to emulate the Exchange environment

Answer: B

Question: 10

An IBM System Storage DS8300 is being installed at a global corporation's headquarter location. The storage must be available worldwide. A great deal of coordination is required to schedule this implementation across the corporation. Who is best positioned to fill the role of implementation resource coordinator?

- A. IBM Service Support Representative
- B. IBM Advanced Technical Support Representative
- C. IBM Field Technical Support Representative
- D. Customer IT Manager

Answer: D

Question: 11

A customer has requested an IBM System Storage DS8300 solution to meet the following requirements: - 20% yearly growth - 29,000 IOPS - approximately 50/50 mix of read/write operations - small (4 KB) data transfers The storage specialist has created a Disk Magic model in which each port is capable of approximately 2,900 to 3,100 IOPS. What is the minimum number of ports that should be configured on the DS8300 to handle the projected workload for the first year?

- A. 8
- B. 10
- C. 12
- D. 16

Answer: C

Question: 12

A bank has requested proposals for a storage solution to upgrade their disaster recovery processes for their IBM System z, UNIX, and Microsoft Windows environment. The solution must simulate a multi-site environment and provide the customer the ability to evaluate Metro Mirror, Global Mirror, Global Mirror for z/OS, and FlashCopy. Floor space is limited. Which solution best meets the specified requirements?

- A. Two IBM System Storage DS8100 systems
- B. One IBM System Storage DS8300 with LPAR
- C. Two IBM System Storage DS6800 systems in a single rack
- D. One IBM System Storage DS6800

Answer: B

Question: 13

A customer wants to consolidate storage from four IBM System p servers and one large IBM System i server. The customer does not have a SAN installed. The customer will require approximately 4 TB for System p and 3 TB for System i. The customer states that performance and isolation of the System i system is most important. Capacity, multi-path access, and replication functions are important for the System p servers. Which solution best satisfies the customer requirements?

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
