If you use pass4sureofficial 000-440 Certification questions and answers, you will experience actual 000-440 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-440 exam. Every point from pass4sure 000-440 PDF, 000-440 review will help you take IBM 000-440 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-440 course:

- * Up-to-Date IBM 000-440 questions taken from the real exam.
- * 100% correct IBM 000-440 answers you simply can't find in other 000-440 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-440 PDF.
- * IBM 000-440 brain dump free content featuring the real 000-440 test questions.

IBM 000-440 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-440 exam training are an absolute favorite in the industry. You will pass IBM 000-440 certification test and career opportunities will be open for you.

Question: 1

A company maintains and distributes a customized AFP plug-in to allow Internet access to their AFP statements. Which of the following changes would require that a new AFP plug-in be deployed?

- I. The addition of a new AFP statement that requires new custom fonts.
- II. The addition of a new AFP statement that requires a new pagedef.
- III. A change has been made to the character set definition file.
- IV. A change has been made to an existing AFP overlay.

- A. IV only
- B. I and II
- C. I and III
- D. I, II and III

Answer: C

Question: 2

A user would like to convert PCL data and display it to the Web browser in PDF format. Which of the following must the administrator do to accomplish this?

- A. Set the PCL_DISPLAY variable to Yes
- B. Change the configuration file on the Client PC
- C. Incorporate the AFP2WEB transforms in the Web Enablement Kit
- D. Incorporate the Xenos transforms into the Web Enablement Kit

Answer: D

Question: 3

After installing and configuring the OnDemand Web Enablement Kit, errors are received when attempting to connect to an OnDemand server. Which of the following options would help determine the source of the problem?

- A. Run the ARSADM -Log command on the OnDemand server
- B. Set the LOG parameter to 1 in the DEBUG section of the ARSWWW.INI file
- C. Check the ARSWWW.CGI binary for error condition switches that have been thrown
- D. Set the CACHEDOCS parameter to 1 in the CONFIGURATION section of the ARSWWW.INI file

Answer: B

Question: 4

Which of the following is required to provide Java servlet support for the OnDemand Web Enablement Kit?

- A. Java-enabled HTTP server only
- B. Java application server with SSL support
- C. Java-enabled HTTP server with SSL support
- D. Java-enabled HTTP server with a Java application server

Answer: D

Question: 5

Which of the following can be performed with the OnDemand Client for Microsoft Windows, but NOT with the OnDemand Web Enablement Kit?

- A. View full fidelity AFP and PDF documents
- B. Display the annotation flags on the hit list
- C. Select area in document for export to other applications
- D. View multiple documents from multiple folders in one window

Answer: D

Question: 6

The AFP2PDF transform is being used to convert documents and resources for display using the OnDemand Web Enablement Kit. Which of the following is included in the AFP2PDF.INI file?

- A. The full address of the HTTP server
- B. One stanza for each AFP application and one default stanza
- C. The AFP resources file that is being used for the conversion
- D. A list of all of the PDF viewers that are used for displaying the converted documents

Answer: B

Question: 7

The OnDemand Web Enablement Kit has been installed and running against a test OnDemand server. It is time to begin accessing the production OnDemand server. In which of the following locations does the OnDemand Administrator make this change?

- A. Plug-in software on the client PC
- B. Within the CGI program on the Web Server
- C. ARSWWW configuration file on the Web Server
- D. ARS configuration file on the OnDemand Server

Answer: C

Question: 8

Which of the following statements best describes the manner in which the OnDemand Web Enablement Kit handles large objects when being viewed by the AFP Plug-in?

- A. A document segment is uncompressed at the server and sent to the Web client. As the user moves through the document, the next segment is requested, as needed, from the server.
- B. The entire document is sent from the server to the Web client compressed. The entire document is then uncompressed by the client. The user may move through the document without making any further requests of the server.
- C. A document segment is sent from the server to the Web client compressed. The segment is then uncompressed by the client. As the user moves through the document, the next segment is requested, as needed, from the server.
- D. The entire document is sent to the Web client compressed. The client uncompresses the first segment. As the user moves through the document, each segment is uncompressed by the client as necessary, without making any further requests of the server.

Answer: C

Question: 9

When a user logs in to OnDemand through the Web Enablement Kit, the user id and password are displayed in the URL. Which of the following will hide this information?

- A. The "nohtml" value of the logon API
- B. The "hidestring" value of the logon API

- C. The GET method in the custom defined forms
- D. The POST method in the custom defined forms

Answer: D

Question: 10

A report file fails to load after indexing successfully. The system log message contains the following text:

The string " 7/03/01" could not be converted to a date from the format of %m/%d/%y

Which of the following actions should be taken to ensure that the report file will load on the next attempt?

- A. Change the application to specify a default format option for the date field.
- B. Change the application group to specify a default format option for the date field.
- C. Change the application to remove leading ' ' (blank) characters from the date field.
- D. Change the application group to remove leading ' ' (blank) characters from the date field.

Answer: C

Question: 11

The OnDemand System Log shows that a report did not load and the cause for this cannot be determined. Which of the following would probably NOT be required when IBM Support is contacted for help?

- A. Folder Report
- B. Application Report
- C. Fix pack/ptf level
- D. Application Groups Report

Answer: A

Question: 12

In OnDemand for Multiplatforms, an administrator needs to verify a new OnDemand system by indexing and loading a sample document. Which of the following commands can be used to perform this function?

- A. ARSDB
- B. ARSADM
- C. ARSADMIN
- D. ARSMAINT

Answer: C

Question: 13

An OnDemand system is being enabled to provide alert information to the system administrator based on the severity of certain system messages. Which of the following options would need to be implemented to provide alerts to the administrator?

- A. Enable the OnDemand System Alert function.
- B. Customize the OnDemand System Log User Exit to capture the messages and issue alerts.
- C. Customize the Microsoft Windows Event Log Viewer to issue administrator alerts for all messages.
