Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-061 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-061 Certification questions and answers, you will experience actual 000-061 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-061 exam. Every point from pass4sure 000-061 PDF, 000-061 review will help you take IBM 000-061 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-061 course:

- * Up-to-Date IBM 000-061 questions taken from the real exam.
- * 100% correct IBM 000-061 answers you simply can't find in other 000-061 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-061 PDF.
- * IBM 000-061 brain dump free content featuring the real 000-061 test questions.

IBM 000-061 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-061 exam training are an absolute favorite in the industry. You will pass IBM 000-061 certification test and career opportunities will be open for you.

Question: 1

A manufacturing customer is not concerned about system failure, they believe their 2 week manufacturing cycle allows for recovery. You wish to identify an opportunity for business resilience. Which of the following is the impact of system failure?

- A. Automated recovery capabilities
- B. Redundant servers
- C. Quality of Service
- D. Resource utilization

Answer: C

Question: 2

Identifying each customer recovery and budget requirements is an important first step in a Business Resilience (BR) engagement. A customer determines they have anRTO of 2-6 hours. Which of the following addresses this BR requirement?

- A. Continuous availability, end to end automation
- B. Rapid data recovery
- C. Tape based backup and restore
- D. Real time data and server replication

Answer: B

Question: 3

A fundamental driver for the efficiency of any server is the level of utilization that is achieved. What are the typical current utilization levels for various processor types and what should be done to increase this utilization?

- A. Mainframe 80%
- B. Unix >50%
- C. X86 >10%
- D. Mainframe 100%
- E. Unix >40%
- F. X86 >10%
- G. Mainframe >80%
- H. Unix 15-25%
- I. X86 <10%
- J. Mainframe >80%
- K. Unix >50%
- L. X86 >20%
- M. Application provisioning

Answer: C

Question: 4

Estimating resources can be the most difficult task in the performance-planning process. What are the components that the NEDC Technical Leader should be primarily interested in?

- A. CPU time, disk access rate, LAN traffic, amount of real memory
- B. Disk access rate, number of simultaneous users, number of concurrent batch jobs
- C. Paging rate, CPU time, networking bandwidth
- D. CPU clock speed, operating system type and communication I/O

Answer: A

Question: 5

A large manufacturing customer datacenter has reached its physical limits. Which of the following is the key element in the Active Energy Strategy green agenda?

- A. IT Management solution to monitor IT Assets
- B. Facility monitoring into single portal
- C. Smart management of IT devices, cooling systems and virtualization of infrastructure
- D. A full chargeback suite for usage and accounting

Answer: C

Question: 6

A securities trading bank has a critical performance issue. Peaks in trading behavior temporarily result in a huge number of orders which must be processed in time to avoid penalties. Which of the following meets this immediate situation?

- A. IBM SAN Volume Controller provides outstanding performance. Develop a virtualized architecture with the customer to leverage caching properties to meet the
- B. IBM server technology with CUoD
- C. Analyze the business application; providing high performance solutions for a few peaks is not cost
- D. affective. Suggest your customer negotiate the service levels
- E. Identify the real issue and develop the proper solution combining software, hardware and services out of IBM comprehensive portfolio.

Answer: B

Question: 7

A prospect is confused with the multiple pillars (BR, EE, VC, and II) within the NEDC strategy. They are interested in virtualization and consolidation, but are concerned that too many pillars will result in a compromise and a poor solution. Which of the following is an effective response?

- A. The pillars are interrelated and should be implemented together for maximum benefit
- B. NEDC Innovation Workshop will help them identify which pillars are most critical and create a roadmap for implementation of one or more pillars
- C. NEDC pillars should be implemented one at a time like most applications, combining them as goals makes implementation very difficult
- D. Select the most urgent with the highest ROI. Once a successful track record is established other pillars should be implemented

Answer: D

Question: 8

Following successful implementation of a NEDC project, the customer is concerned all of the objectives were not achieved. Which of the following would provide a check point for the project objectives for comparison?

- A. NEDC Innovation Workshop
- B. Scorpion study
- C. Technical and Delivery Assessment
- D. Team Solution Design

Answer: A
