

000-210

IBM

IBM Storage Networking Solutions, Version 4

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-210>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-210 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-210 Certification questions and answers, you will experience actual 000-210 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-210 exam. Every point from pass4sure 000-210 PDF, 000-210 review will help you take IBM 000-210 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-210 course:

- * Up-to-Date IBM 000-210 questions taken from the real exam.
- * 100% correct IBM 000-210 answers you simply can't find in other 000-210 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-210 PDF.
- * IBM 000-210 brain dump free content featuring the real 000-210 test questions.

IBM 000-210 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-210 exam training are an absolute favorite in the industry. You will pass IBM 000-210 certification test and career opportunities will be open for you.

Question: 1

Which type of security should be implemented to control device to storage connections in a heterogeneous environment?

- A. WWN Access Control Lists
- B. LDAP hosted on a Linux server
- C. NFS with Windows userID mapping
- D. CIFS with Samba

Answer: A

Question: 2

A customer wants to create a second set of their database application to run tests against, and wants the database to be as close to production as possible, without creating any impact to the production environment. Which offering is the most cost-effective way to accomplish this?

- A. SyncMirror
- B. SnapMirror
- C. FlexCache
- D. FlexClone

Answer: D

Question: 3

When implementing SnapMirror using best practices, which percentage of the available capacity is reserved for the copies?

- A. 5%
- B. 10%
- C. 20%
- D. 25%

Answer: D

Question: 4

A customer infrastructure has an N7600 clustered storage attached via FC SAN to more than 50 high-end servers. These servers are configured to access storage on Node A, while Node B is primarily used as a standby device. Users are reporting poor performance. What is the most cost-effective way to address the performance bottlenecks?

- A. Add more FC disks to Node A and assign disk ownership during a scheduled maintenance window
- B. Change Node B to active and redistribute disk ownership equally during a scheduled maintenance window
- C. Dynamically move half of the servers from Node A to Node B and run performance tuning on both nodes
- D. Change the configuration to Active/Active, which automatically redistributes the disk ownership

Answer: B

Question: 5

A customer's environment has the following protocols: CIFS, NFS, HTTP, FTP, iSCSI, and FCP. Which solution provides unified data access in this environment?

- A. IBM DS3000 series

- B. IBM DS5000 series
- C. IBM x3650
- D. IBM System Storage N7000

Answer: D

Question: 6

What is the maximum number of LUNs that are supported with the IBM System Storage N3600?

- A. 256
- B. 512
- C. 1024
- D. 2048

Answer: C

Question: 7

A customer is considering purchasing a new N series storage subsystem. They require HTTP, FTP, CIFS, NFS, and FCP connectivity. Which licenses must be purchased?

- A. HTTP, FCP, NFS, and CIFS
- B. FCP, FTP, and CIFS only
- C. Data ONTAP, HTTP, FCP, and CIFS
- D. Data ONTAP, FTP, FCP, and CIFS

Answer: A

Question: 8

What is a key reliability advantage of the N series Data ONTAP?

- A. RAID-DP
- B. RAID-4
- C. RAID-5E
- D. RAID-1E

Answer: A

Question: 9

A customer is planning a migration from a 2GB to 4GB redundant SAN infrastructure. The customer asks a storage specialist for assistance planning the SAN infrastructure modification to reduce disruption to the environment. What should the storage specialist recommend?

- A. Power off one fabric, move all connections to the new fabric, power up the new fabric, and immediately repeat the process on the redundant fabric
- B. Power off one fabric, move all connections to the new fabric, power up the new fabric, and wait two days before repeating on the redundant fabric
- C. Power up the switches in a new fabric, move one connection at a time from one old fabric to a new fabric, and immediately repeat the process for the redundant
- D. Fabric
- E. Power up the switches of a new fabric, move one connection at a time, and wait two days before repeating on the redundant fabric

Answer: D

Question: 10

A customer is looking for a solution that delivers comprehensive monitoring and management for N series enterprise storage. The customer needs a central point of control to manage alerts, reports, and configuration tools to keep its storage infrastructure in line with business requirements. The customer also wants maximum availability and reduced total cost of ownership. Which solution is most appropriate?

- A. IBM Tivoli Productivity Center for NAS
- B. IBM Tivoli Storage Manager
- C. IBM Director
- D. Operations Manager

Answer: D

Question: 11

A customer wants to upgrade the existing 1Gb fabric with 13 attached hosts and two IBM DS4700 storage subsystems. The customer needs to upgrade the fabric to 4Gb and add additional servers with dual-path connectivity, while forecasting a server growth rate. Which SAN product provides the greatest flexibility and scalability?

- A. two 2027-140s
- B. two 2053-E11s
- C. two 2005-B64s
- D. six 2005-b16s with ISLs

Answer: B

Question: 12

What is the maximum number of allowed paths between an N series gateway and a switch, when the gateways are deployed with DS4700 storage subsystems?

- A. 1
- B. 2
- C. 4
- D. 8

Answer: B

Question: 13

A customer has a highly available IBM TSM backup solution. The AIX server has two HBAs and uses an IBM TS3500 LTO tape library and DS4800 storage. The customer is experiencing backup failures due to link loss conditions with the tape drive. Which design should prevent these backup failures?

- A. Upgrade the TSM server to support Server-Free backup
- B. Separate the HBAs in the server to minimize optical crosstalk
- C. Add HBAs to the server and add separate tape and disk zonesets
- D. Add HBAs to the server and add separate tape and disk LUN masking

Answer: C

Question: 14

A customer wants to assign a relative priority on a N7600 to a volume, and to cause accesses to that volume to receive a priority that is higher or lower than that of other volumes on the storage system. Which feature accomplishes this?

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
