

000-806

IBM

IBM WebSphere Application Server Network Deployment V6.1, Advanced Administration

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-806>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-806 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-806 Certification questions and answers, you will experience actual 000-806 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-806 exam. Every point from pass4sure 000-806 PDF, 000-806 review will help you take IBM 000-806 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-806 course:

- * Up-to-Date IBM 000-806 questions taken from the real exam.
- * 100% correct IBM 000-806 answers you simply can't find in other 000-806 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-806 PDF.
- * IBM 000-806 brain dump free content featuring the real 000-806 test questions.

IBM 000-806 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-806 exam training are an absolute favorite in the industry. You will pass IBM 000-806 certification test and career opportunities will be open for you.

Question: 1

Which statement is true about designing highly available infrastructures based on WebSphere Application Server ND V6.1 clusters?

- A. A stand-alone server topology provides the greatest amount of process isolation and therefore is the most effective building block in combination with other stand-alone servers for building a highly resilient cluster based infrastructure.
- B. A horizontal scaling topology provides the greatest opportunity to implement efficient use of single machine processing power so that should there be a failover in that environment, there will be sufficient capacity available for the remaining nodes to pick up the workload from the failed node.
- C. A vertical scaling topology provides the greatest opportunity to implement efficient use of machine processing power so that should there be failover in that environment, there is sufficient capacity available for the remaining cluster members to pick up the workload from the failed cluster member.
- D. A horizontal scaling topology provides the greatest amount of process isolation and therefore is the most effective building block in combination with other stand-alone servers for building a highly resilient cluster based infrastructure.

Answer: C

Question: 2

An administrator is configuring a cluster bus destination on a cluster with five members on five different physical machines. The administrator will configure two messaging engines which may be run on any of the five cluster members. What is the simplest configuration for the messaging engines' data stores that still ensures proper fail over?

- A. A file-based data store in the config directory that is kept in sync on all cluster members by the deployment manager
- B. A single remote database accessible by all cluster members with one schema to be shared by the messaging engines
- C. A single remote database accessible by all cluster members with two schemas
- D. Two remote databases accessible by all cluster members

Answer: C

Question: 3

A WebSphere Application Server ND V6.1 administrator has been asked to set up cache replication for an application. The application team wants to make sure it does not lose any cache data that is generated. What would make losing cache data least likely to happen?

- A. Full group replication
- B. Enable disk offload
- C. Push only
- D. Flush to disk

Answer: B

Question: 4

A WebSphere Application Server ND V6.1 administrator recently added a new cluster member. When the administrator checked the status of the servers in the cluster, they noticed the cluster showing a state of partially started. What does that mean?

- A. All cluster members are running, but the node agents have not been started.

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
