IBM

IBM WebSphere Message Broker v6.1, Solution Development

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-315>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-315 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-315 Certification questions and answers, you will experience actual 000-315 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-315 exam. Every point from pass4sure 000-315 PDF, 000-315 review will help you take IBM 000-315 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-315 course:

- * Up-to-Date IBM 000-315 questions taken from the real exam.
- * 100% correct IBM 000-315 answers you simply can't find in other 000-315 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-315 PDF.
- * IBM 000-315 brain dump free content featuring the real 000-315 test questions.

IBM 000-315 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-315 exam training are an absolute favorite in the industry. You will pass IBM 000-315 certification test and career opportunities will be open for you.

Questions: 1

There is a requirement to integrate Message Broker V6.1 with a messaging system that conforms to Java Message Service Specification V1.1. Which messaging transport should be used for integration purposes?

- A. MQ Mobile
- B. Broker JMS
- C. Web Services
- D. MQ Enterprise

Answer: B

Questions: 2

A Message Broker V6.1 developer is implementing a message flow with an JMSInput node, JavaCompute node and a JMSReply node. The logic in the JavaCompute node inserts a record to a database table using a JDBC Type 4 connection. Which three tasks have to be performed to ensure that the JMS, the database and the JMS transactions are synchronized?

- A. Create the JDBC connection using an XADataSource.
- B. Set the Transaction mode of the JMSInput and JMSReply nodes to Local.
- C. Set the Transaction mode of the JMSInput and JMSReply nodes to Global.
- D. Set the Backout destination of the JMSInput node to hold In-doubt transactions.
- E. Use the broker Java API getJDBCType4Connection to initiate the JDBC connection.
- F. Configure a XAResourceManager for both the JDBC and JMS connections in the broker's queue manager.

Answer: C, E, F

Questions: 3

Which component is the contract that describes to the Message Broker V6.1 developer how to build a Web service request?

- A. WSDL
- B. Namespace
- C. HTTP Header
- D. SOAP Envelope

Answer: A

Questions: 4

When designing an online auction store, one of the key architectural decisions made was to handle and secure Web traffic using Message Broker V6.1. Two important aspects of security need to be addressed in the solution: authentication and message integrity. Which transport node is the most appropriate for implementing this scenario?

- A. MQ
- B. TCP
- C. SOAP
- D. HTTP

Answer: C

Questions: 5

A Message Broker V6.1 developer builds a message flow to act as a server for an MQ based Request/Reply pattern that ends with an MQReply node. If a message is received that does not specify a ReplyToQueue in the MQMD, what will the MQReply node do?

- A. Throw an exception.
- B. Put the message on the source queue.
- C. Put the message on the backout queue.
- D. Put the message on the dead letter queue.

Answer: A

Questions: 6

A Message Broker V6.1 developer receives a request to authenticate and authorize Web service requests to a message flow with username and password provided as WS-Security username tokens against a Microsoft Active Directory. Which action must be performed by the developer to fulfill this request?

- A. Set the Use HTTPS property of the SOAPInput node.
- B. Add a username token in the WS-Security table of the SOAPInput node.
- C. Add a username and a password as user-defined SOAP headers of the SOAPInput node.
- D. Nothing, the Message Broker administrator that deploys the message associates the right security profile.

Answer: D

Questions: 7

A Message Broker V6.1 developer needs to put an HTTP input message onto an MQ queue for downstream processing. After clearing the HTTP headers, what is the simplest way to build an MQMD?

- A. Write ESQL code to construct an MQMD.
- B. Let the MQOutput node build a default MQMD.
- C. Use the SOAPEXtract node to build an MQMD.
- D. Use the ResetContentDescriptor node to build an MQMD.

Answer: B

Questions: 8

A Message Broker V6.1 developer has been asked to develop a message flow that picks up a file every minute from ftp server ftp.acme.com with ftpuser as the username and Pa\$\$w0rd as the password. The developer has added a FileInput node to the message flow. Which three other tasks need to be performed?

- A. Set Polling interval of FileInput node to: 60.
- B. Set ftp.acme.com as FTP server on FileInput node.
- C. Set ftpuser as Security identity on FileInput node.
- D. Set ftpuser/Pa\$\$w0rd as Security identity on FileInput node.
- E. Issue the "mqsisetdbparms MY_BROKER -n ftp::ftpuser -u ftpuser -p Pa\$\$w0rd" runtime command.
- F. Issue the "mqsicreateconfigurablesevice MY_BROKER -c TCPIPServer -o 1452" runtime command.

Answer: B, C, E

Questions: 9

A Message Broker V6.1 developer wants to create a message flow that will act as a Web service. What does the developer need to utilize to assure the message elements are uniquely identifiable by the message flow parser?

- A. WSDL
- B. Namespace
- C. HTTP Header
- D. SOAP Envelope

Answer: B

Questions: 10

A Message Broker V6.1 developer has been asked to develop a message flow to route SOAP/HTTP-based Web service requests to the appropriate provider without access to the WSDL of the providers. Which set of built-in nodes is the most appropriate for implementing this message flow?

- A. An HTTPInput node, a Route node, an HTTPRequest node and an HTTPReply node.
- B. A SOAPInput node, an EndpointLookup node, a SOAPRequest node and a SOAPReply node.
- C. A SOAPInput node, a DatabaseRetrieve node, a SOAPRequest node and a SOAPReply node.
- D. An HTTPInput node, a DatabaseRetrieve node, an HTTPRequest node and an HTTPReply node.

Answer: D

Questions: 11

A flow is being developed to interact with an EIS system using one of the native adapter nodes. As part of the development process, which artifacts should be dragged onto the flow editor canvas to create the flow template?

- A. WSDL
- B. Business Object
- C. Message Definition
- D. Adapter Connection

Answer: D

Questions: 12

A message flow has been developed to receive a record with an MQInput node and store it by appending it to a local file using the FileOutput node. When the message flow is tested by sending five test messages, only the record from the last message gets stored in the local file. What is the most probable cause of this behavior?

- A. The file already exists in the mqsitransit directory.
- B. The FileOutput node does not support appending data to an existing file.
- C. The developer did not connect the Finish File terminal of the FileOutput node.
- D. The Record definition property of the FileOutput node is set to "Record is Whole File".

Answer: D

Questions: 13

A developer who is very familiar with writing XPath expressions in the mapping editor has been asked to convert several of the company's current message flows. The message flows use mappings to do message transformation to message flows which use Java to do transformations.

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
