- A. Inability of users to stch between multiple profiles
- B. Inability of settings to be saved against mandatory profiles
- C. Profile bloat because extraneous files are copied to the profile
- D. Printing failure because printer properties are not updated at each logon

Answer: C

QUESTION: 8

DRAG DROP

A user is attempting to access a virtual desktop remotely Click the 'Task' button to place the steps in the desktop delivery process in the correct order Click the 'Exhibit button for instructions on how to complete a Drag and Drop item.

The screenshot shows a window titled "Place the steps in the desktop delivery process in the correct order. Click the 'Done' button when finished." The window contains five rows, each with a cyan box on the left and a yellow box on the right. The cyan boxes contain the following text from top to bottom: "The Desktop Receiver initiates a connection to the Visual Desktop Agent.", "The Desktop Delivery Controller determines which desktop to give to the user", "The user logs on to the web site.", "The virtual desktop is presented to the user", and "The web site sends an ICA file to the Desktop Receiver". The yellow boxes contain the text "Place step 1 here", "Place step 2 here", "Place step 3 here", "Place step 4 here", and "Place step 5 here" respectively. A mouse cursor is positioned over the yellow box for "Place step 3 here". At the bottom center of the window is a "Done" button.

What is the correct order of steps in the desktop delivery process?

Answer:

**Explanation:**

1. The users logs on the web site
2. The desktop delivery controller determines which desktop to give to the user
3. The web site sends an ICA file to the Desktop Receiver
4. The Desktop Receiver initiates a connection to the Virtual Desktop Agent
5. The virtual destop is presented to the user
