Implementing HP ProLiant Servers

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=HP0-645>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your HP0-645 exam in first attempt, but also you can get a high score to acquire HP certification.

If you use pass4sureofficial HP0-645 Certification questions and answers, you will experience actual HP0-645 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our HP exam prep covers over 95% of the questions and answers that may be appeared in your HP0-645 exam. Every point from pass4sure HP0-645 PDF, HP0-645 review will help you take HP HP0-645 exam much easier and become HP certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial HP HP0-645 course:

- * Up-to-Date HP HP0-645 questions taken from the real exam.
- * 100% correct HP HP0-645 answers you simply can't find in other HP0-645 courses.
- * All of our tests are easy to download. Your file will be saved as a HP0-645 PDF.
- * HP HP0-645 brain dump free content featuring the real HP0-645 test questions.

HP HP0-645 certification exam is of core importance both in your Professional life and HP certification path. With HP certification you can get a good job easily in the market and get on your path for success. Professionals who passed HP HP0-645 exam training are an absolute favorite in the industry. You will pass HP HP0-645 certification test and career opportunities will be open for you.

QUESTION 1:

What is the most likely problem when you receive only audible codes (beeps) during POST?

- A. The monitor signal is not connected.
- B. The system sees intermittent memory parity errors.
- C. No memory modules are present.
- D. The monitor is in power saver mode.

Answer: C.

QUESTION 2:

You need to replace a PCI controller in a HP ProLiant server while the server is running. PCI Hot-Plug technology enables you to shut down power to the PCI_____.

- A. riser board
- B. bridge
- C. bus
- D. slot

Answer: D.

QUESTION 3:

Because of the power and heat generated by systems in a racked environment, what should do to ensure that excessive thermal conditions do not impede production activities? Select two.

- A. Align rows of racked systems in the same direction 1 meter apart.
- B. Use blanking panels for unused space within the rack.
- C. Enclose the front of the rack with a ventilated door.
- D. Enclose the rear of the rack with a solid door.
- E. Remove the side panels on the rack enclosure.

Answer: B, C.

QUESTION 4:

Which System Agent will shut down an HP Industry Standard Server when a thermal event occurs?

- A. Storage agent
- B. Server agent
- C. Power agent
- D. Foundation agent

Answer: D.

QUESTION 5:

You are troubleshooting a system with PCI slots, but you do not know what voltage the PCI slots support. Which PCI card can operate in a 5V or 3.3V PCI slot?

- A. A standard 32-bit 33 MHz PCI card
- B. A universal PCI card
- C. A dual-capability 32/64-bit PCI card
- D. An advanced 33/66MHz PCI card

Answer: B.

QUESTION 6:

A company has several similarly configured application servers deployed throughout its facilities. All but one server are meeting performance expectations. To determine the performance problem, the IT staff would like to collect historical performance information over the past several weeks from these servers and compare the data against the under performing server. This information must include platform-specific data from all major subsystems and their components. Which tool would be best suited for this task?

- A. Performance Management Pack (PMP)
- B. Workload Management Pack (WMP)
- C. Windows System Monitor
- D. HP OpenView

Answer: A.

QUESTION 7:

In a properly configured HP rack enclosure, airflow is designed to flow_____.

- A. In the top and out the bottom.
- B. In the front and out the top within the enclosure.
- C. In the front and out the back within the enclosure.
- D. In the rear and out the top within the enclosure.

Answer: C.

QUESTION 8:

After replacing several drives, the same hard drives repeatedly go into prefailure state. What should you do?

HP0-645

- A. Run the Array Configuration Utility and check the health of the storage.
- B. Run the Array Configuration Utility and analyze the report before deciding on a further course of action.
- C. Suggest replacing the drive cage and array controller.
- D. Upgrade the server ROMpaq and monitor for reoccurrence of the problem.

Answer: B.

QUESTION 9:

There is a drive failure in an array with an online spare. It is attached to a Smart Array controller. When replaced, the drive will _____.

- A. do nothing until you manually rebuild the array
- B. automatically become the online spare, leaving the array intact
- C. automatically rebuild and the online spare will return to being an online spare
- D. do nothing until is manually reset, initialized, identified, and configured on the controller

Answer: C.

QUESTION 10:

You have added a second Smart Array controller to an HP ProLiant server. Your server is trying to boot from the wrong controller. How would you resolve this problem?

- A. Install Insight Manager 7 and run Survey Utility.
- B. Run the ACU and disable the drives that the operating system is booting from.
- C. Run the ADU and determine the fault with the drives that should be booting.
- D. Execute the RBSU and change the controller boot order.

Answer: D.

QUESTION 11:
