EMC

Information Availability Design and Management

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=E20-012>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your E20-012 exam in first attempt, but also you can get a high score to acquire EMC certification.

If you use pass4sureofficial E20-012 Certification questions and answers, you will experience actual E20-012 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our EMC exam prep covers over 95% of the questions and answers that may be appeared in your E20-012 exam. Every point from pass4sure E20-012 PDF, E20-012 review will help you take EMC E20-012 exam much easier and become EMC certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial EMC E20-012 course:

- * Up-to-Date EMC E20-012 questions taken from the real exam.
- * 100% correct EMC E20-012 answers you simply can't find in other E20-012 courses.
- * All of our tests are easy to download. Your file will be saved as a E20-012 PDF.
- * EMC E20-012 brain dump free content featuring the real E20-012 test questions.

EMC E20-012 certification exam is of core importance both in your Professional life and EMC certification path. With EMC certification you can get a good job easily in the market and get on your path for success. Professionals who passed EMC E20-012 exam training are an absolute favorite in the industry. You will pass EMC E20-012 certification test and career opportunities will be open for you.

Question: 1

A company has decided to use SAN-based replication to migrate data from older storage arrays to a new storage array. The new array is capable of performing SAN-based replication, while the older arrays cannot perform SAN-based replication. A migration downtime window is available. Which SAN-based replication option should be recommended?

- A. Cold pull from the older arrays to the new array
- B. Cold push from the older arrays to the new array
- C. Hot pull from the older arrays to the new array
- D. Hot push from the older arrays to the new array

Answer: A

Question: 2

What is a key characteristic of an electronic data archive?

- A. Ideal for storing long-term unchanging data
- B. Primarily used for the short term and is often updated and overwritten
- C. Primarily used to store server backups
- D. Used as a secondary copy of critical information

Answer: A

Question: 3

A company is planning to deploy array-based synchronous remote replication over 200 MB/s Fibre Channel links. The workload profile of the application to be replicated is as follows:

4000 IO/s

Read/Write Ratio 60:40

Write block size 8KB

Distance between sites = 50 km

Write acceleration devices will not be used

What is the approximate propagation delay for one write?

- A. 0.5 ms
- B. 1.0 ms
- C. 2.0 ms
- D. 4.0 ms

Answer: B

Question: 4

What is a primary function of EMC Backup Advisor?

- A. Backup job automation
- B. Central administration
- C. Provisioning
- D. Troubleshooting

Answer: D

Question: 5

When using Celerra Replicator, what is a key difference between local and remote replication?

- A. Local uses a single SavVol; remote uses a single SavVol

- B. Local uses a single SavVol; remote uses two SavVols
- C. Local uses two SavVols; remote uses a single SavVol
- D. Local uses two SavVols; remote uses two SavVols

Answer: B

Question: 6

A company is configuring a new backup policy for a group of clients. They need to be able to recover from a disaster by using a maximum of two backup media sets at any given day of a month. Which backup policy would satisfy this requirement?

- A. Monthly fulls and daily incrementals
- B. Monthly fulls, weekly cumulatives, and daily incrementals
- C. Weekly fulls and daily cumulatives
- D. Weekly fulls and daily incrementals

Answer: C

Question: 7

Click the Exhibit button.

You are designing a new backup and recovery solution and have specified that a disk-aware backup-to-disk solution will be used as the primary destination for backups. Once backups reach a specific retention period on disk, they will be moved to tape. What should the retention period be to satisfy 90% of the e-mail restore requests from disk?

- A. 7 days
- B. 14 days
- C. 30 days
- D. 45 days

Answer: A

Question: 8

Which factors affect response time in synchronous remote replication?

- A. Read block size, network equipment, and bandwidth
- B. Read workload, distance, and network equipment
- C. Recovery point objective, distance, and bandwidth
- D. Write block size, distance, and bandwidth

Answer: D

Question: 9

How is data written using the linear recording method in a tape drive?

- A. By using multiple heads in parallel tracks, spanning the whole tape
- B. Multiple heads move in a vertical fashion, writing data in the same way linearly
- C. Read and write heads on a drum rotate, storing data in diagonal tracks
- D. Read and write heads on a drum rotate, storing data in linear tracks across the whole tape

Answer: A

Question: 10

What describes a virtual replica target?

- A. Half the size of the production volume
- B. Holds original data for point-in-time access
- C. Holds pointers to data location
- D. Same size as the production volume

Answer: C

Question: 11

What is an advantage of using a consolidated media management feature within a virtual tape library appliance?

- A. Better cloning performance achieved by consolidated media catalog processes
- B. Easier management of restore operations by having a copy of the backup catalog on the appliance
- C. Enhanced scalability by enabling the connection of a physical library to the appliance for cloning purposes
- D. Improved management since backup software is aware of all cloning operations made by the appliance

Answer: D

Question: 12

In which strategic tier of the Framework for Information Availability can Backup and Replication Integrity be found?

- A. Automate
- B. Create Copies
- C. Distribute
- D. Store

Answer: B

Question: 13

Which operating system tool or command can be used to test a tape drive in a UNIX system?

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
