## IBM

### *Test665.Architectural Design of SOA Solutions*

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-665>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-665 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-665 Certification questions and answers, you will experience actual 000-665 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-665 exam. Every point from pass4sure 000-665 PDF, 000-665 review will help you take IBM 000-665 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-665 course:

- \* Up-to-Date IBM 000-665 questions taken from the real exam.
- \* 100% correct IBM 000-665 answers you simply can't find in other 000-665 courses.
- \* All of our tests are easy to download. Your file will be saved as a 000-665 PDF.
- \* IBM 000-665 brain dump free content featuring the real 000-665 test questions.

IBM 000-665 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-665 exam training are an absolute favorite in the industry. You will pass IBM 000-665 certification test and career opportunities will be open for you.

**Question: 1**

Data federation is often cited as a data integration alternative to a data consolidation approach (i.e., data warehouse). Which of the following is the best reason to adopt a data federation versus data consolidation approach?

- A. The set of data to be queried by the end-user is known in advance.
- B. Data security, licensing restrictions, or industry regulations restrict data movement.
- C. Complex transformation is required to achieve semantically consistent data.
- D. Security requirements are more easily implemented using a federated approach.

**Answer: B**

**Question: 2**

In which of the following situations is transport level security most appropriate?

- A. If the SOA solution requires assured transport delivery
- B. If the SOA solution requires security for all messages across a network
- C. If the SOA solution is not exposed to outside business partners
- D. If the SOA solution requires decoupling security from the message content

**Answer: B**

**Question: 3**

A set of existing application functionality is to be exposed as services, so that this functionality becomes available across the enterprise. The existing functions can exchange text messages with clients over WebSphere MQ. What is the best approach to integrate these functions into an SOA?

- A. Let clients send text messages directly to the function via WebSphere MQ.
- B. Change the existing application to be able to handle XML formatted data.
- C. Create an additional Web service interface for the function and perform the transformation from XML to text message there.
- D. Use the transformation capabilities of XSLT style sheets at the client end.

**Answer: C**

**Question: 4**

A customer wants to build an SOA solution that allows client requests from .NET or MQ to be dynamically routed based on message contents to service providers implemented on CICS and external Web service providers. Which two of the following solution options are recommended?

- A. WebSphere Process Server for message routing and CICS Transaction Gateway
- B. WebSphere Message Broker for MQ and Web Services connectivity and CICS MQ Adapter
- C. WebSphere Partner Gateway for message routing and MQ connectivity to CICS
- D. WebSphere Interchange Server for message routing and WebSphere Adapters for CICS integration
- E. WebSphere ESB for message routing and CICS Transaction Gateway

**Answer: B, E**

**Question: 5**

Which two of the following standards/specifications best describe IBM's SOA programming model?

- A. Service Component Architecture

## Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
