

# 000-605

## IBM

### *WebSphere Enterprise Service Bus V7.0, Integration Development*

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-605>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-605 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-605 Certification questions and answers, you will experience actual 000-605 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-605 exam. Every point from pass4sure 000-605 PDF, 000-605 review will help you take IBM 000-605 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-605 course:

- \* Up-to-Date IBM 000-605 questions taken from the real exam.
- \* 100% correct IBM 000-605 answers you simply can't find in other 000-605 courses.
- \* All of our tests are easy to download. Your file will be saved as a 000-605 PDF.
- \* IBM 000-605 brain dump free content featuring the real 000-605 test questions.

IBM 000-605 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-605 exam training are an absolute favorite in the industry. You will pass IBM 000-605 certification test and career opportunities will be open for you.

**Question: 1**

An integration developer has been tasked to develop a mediation module that integrates a legacy 2EE application deployed on a remote server. The legacy application is exposed through an EJB facade and the integration developer decides to use an EJB import. What is the most suitable approach to configure it? The integration developer should:

- A. Add the corresponding EJB client project to the module dependencies and select the EJB local interface for the import.
- B. Import the corresponding ejb client project into the workspace and select the ejb remote interface for the import.
- C. Create a wsdl interface with the same operations as the ejb interface, select it as the import interface and add the ejb jndi name in the binding section.
- D. Use the external service wizard to point to the ejb through its iiop url and the wizard automatically creates the interface and the business objects for the import.

**Answer: B**

**Question: 2**

A mediation module must be designed to participate in a transaction initiated by a client component. Which of the following settings should be used by the integration developer to meet the transaction requirements for the mediation module?

- A. Set the Transaction qualifier to False and the Join transaction qualifier to True.
- B. Set the Transaction qualifier to Global and the Join transaction qualifier to True.
- C. Set the Transaction qualifier to Local and the Join transaction qualifier to False.
- D. Set the Transaction qualifier to True and the Join transaction qualifier to True.

**Answer: B**

**Question: 3**

An integration developer is developing a mediation flow component to integrate PeopleSoft Enterprise. The integration developer has identified WebSphere Adapter for PeopleSoft Enterprise for this integration. Which technology specification is implemented by this adapter?

- A. Java EE Connector Architecture (JCA)
- B. Java EE Component Architecture (JCA)
- C. Java EE Connectivity Architecture (JCA)
- D. Java EE Communication Architecture (JCA)

**Answer: A**

**Question: 4**

An integration developer wants to access a database table on a DB2 database installed on an AIX system using a JDBC Adapter. Using the configuration wizard of the JDBC Outbound Adapter import, the integration developer is prompted for JAR files. Which kind of JAR files are required?

- A. AIX specific JAR files
- B. JDBC standard JAR files
- C. DB2 specific JAR files
- D. DB2 and AIX specific JAR files

**Answer: C**

**Question: 5**

An integration developer is developing a mediation flow component using WebSphere Adapters. It is observed that the events are being delivered by multiple threads on several channels simultaneously. What type of event delivery mechanism is used?

- A. Ordered
- B. Unordered
- C. Persistent
- D. Non-persistent

**Answer: B**

**Question: 6**

An integration developer is developing a mediation module using the WebSphere Integration Developer. The mediation module interacts with different databases, via the database lookup mediation primitive and an Enterprise Information system (EIS) binding. It is expected that during the lifetime of this solution, the databases connection details will change. The customer wants to avoid downtime of the applications as much as possible. What is the BEST way for the integration developer to implement a solution so that when database connection details change, downtime is minimized?

- A. Update the details of the database connections, then deploy the updated EAR file.
- B. Define the various database connection details as WebSphere Variables. When a change in the connection details occurs, update the WebSphere Variables on the server and restart the server.
- C. Define the various database connections used as JNDI names. When a change in the connection details occurs, update the JNDI details on the server and restart the application.
- D. Define a properties file for the application to load on startup. When a change in the connection details occurs, update the details in the properties file and restart the application.

**Answer: C**

**Question: 7**

A client wants to invoke a mediation module that contains a mediation flow. Which of the following export bindings with Request-Response interface will ensure that the mediation flow is invoked asynchronously with callback by the client?

- A. HTTP
- B. Web services (SOAP/JMS)
- C. Web services (SOAP/HTTP)
- D. WebSphere MQ or WebSphere MQ-JMS

**Answer: D**

**Question: 8**

Refer to the Exhibits.

|---------------|--|------------------|---------|
| Exam Name:    | WebSphere Enterprise Service Bus V7.0, Integration Development |                  |         |
| Exam Type:    | IBM  | Exam Code:       | 000-605 |
| Certification | IBM WebSphere  | Total Questions: | 113     |

Exhibit A

Exhibit B

An integration developer needs to implement an application to manage the reception of resumes for a job application. The application must allow the applicant to attach a photo in jpeg format. The integration developer decides to create a mediation module exposed through a Web Service Export binding using SOAP with Referenced Attachments to save the photo to a database and send the rest of the data to a business process for further processing. Exhibit A shows the

## Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
