IBM

WebSphere ILOG JRules V7.0, Application Development

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-529>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-529 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-529 Certification questions and answers, you will experience actual 000-529 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-529 exam. Every point from pass4sure 000-529 PDF, 000-529 review will help you take IBM 000-529 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-529 course:

- * Up-to-Date IBM 000-529 questions taken from the real exam.
- * 100% correct IBM 000-529 answers you simply can't find in other 000-529 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-529 PDF.
- * IBM 000-529 brain dump free content featuring the real 000-529 test questions.

IBM 000-529 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-529 exam training are an absolute favorite in the industry. You will pass IBM 000-529 certification test and career opportunities will be open for you.

Exam Name:	WebSphere ILOG JRules V7.0, Application Development		
Exam Type:	IBM	Exam Code:	000-529
Certification:	IBM WebSphere	Total Questions:	53

Question: 1

The Business Analyst has discovered a large number of business rules. The object model and vocabulary is the same for all those rules. The Rule Developer wants to organize the structure of the rules to work on them independently and make them more manageable. Which approach should be used to accomplish this?

- A. Write the rules in several Rule Projects. Create a Rule Project containing the BOM and reference it from the others.
- B. Write all the rules in a unique Rule Project. All the rules of a business rule application must be in a single Rule Project containing a single BOM.
- C. Organize the rules into several Rule Projects in the same workspace. All Rule Projects created in the same Eclipse workspace share the BOM by default.
- D. Organize the rules into several Rule Projects and replicate the BOM in each Rule Project. Any Rule Project has to have its own BOM because it is mandatory in the tool.

Answer: A

Question: 2

A rule set is owned by two different teams: product management and marketing. The Rule Developer must use an industry standard defining a XML schema as the data model with at least 300 classes. Each team should have access to only their authorized elements of the rule set and only the part of the vocabulary needed to write their rules. To avoid an overcomplicated BOM, the Rule Developer wants to use JRules capabilities to expose only the necessary elements to the Rule Writer. Which approach uses these capabilities?

- A.
 1. Design the BOM on top of the XSD.
 2. Use the virtual element and the B2X layer to simplify the vocabulary.
 3. Add categories to the rule project.
 4. Assign category to each BOM element.
 5. Use filter on category at each rule to expose only the necessary vocabulary.
- B.
 1. Design the BOM on top of the XSD.
 2. Develop two BOM entries one for each team.
 3. Use the virtual element and the B2X layer to simplify the vocabulary.
 4. Add a category to the BOM to expose only the necessary vocabulary.
- C.
 1. Change the XSD to have only the complex type for the marketing and the product management.
 2. Design the BOM on top of these new XSDs, one entry per XSD.
 3. Write rules using the available vocabulary.
- D.
 1. Design a Java model wrapper around the XSD to access only elements relevant for the rules.
 2. Build the BOM on top of this Java model.
 3. Write rules using the available vocabulary.

Answer: A

Question: 3

The business users define three types of insurance policy: home, life, and car policy. The XML schema defines a unique policy with a Type attribute. The Rule Developer needs to develop an efficient vocabulary to let business users write the rules. Which action should the Rule Developer perform to make an efficient BOM design, identifying the three policies as distinct terms?

- A. Define a rule set variable for each type of policy and initialize them at the beginning of the rule flow.
- B. Add a BOM class for each policy type in the BOM entry and use the BOM to XOM tester to compare the type of policy.
- C. Change the XML schema to define one complex type for each type of policy, then update the BOM entry using this schema.

Exam Name:	WebSphere ILOG JRules V7.0, Application Development		
Exam Type:	IBM	Exam Code:	000-529
Certification:	IBM WebSphere	Total Questions:	53

D. Extend the XML complex type with Java classes for each type of policy, and then define BOM entries using both the schema and the Java model.

Answer: B

Question: 4

The claim processing application is using web service to support the coverage verification decision point. The BPM product sends XML document to this service. The implementation of this service is using the Rules XML binding. The Rule Developer is using the XML binding capability to build a BOM from the given schema. The complex type defining the claim includes an element called dateOfService of type xsd: date Time. Once the BOM was created using the dynamic binding approach how will this attribute be mapped in the BOM class?

- A. Publicjava.util.Date dateOfService;
- B. Publicilog.rules.xml.types.IlrCalendarDate;
- C. Publicjavax.xml.datatype.XMLGregorianCalendar;
- D. Publicilog.rules.xml.types.IlrDateTime dateOfService;

Answer: D

Question: 5

In a Wireless Telecom provider the Service Level Agreement (SLA) policy defines the following business policy: "A customer service request must be brought to the attention of a supervisor if the request is not resolved within 4 hours". Where the policy should be implemented?

- A. In a BRMS
- B. In a process flow
- C. In the Data Model
- D. In a SQL procedure
- E. In the application code
- F. In a Graphical User Interface

Answer: B

Question: 6

The development team decided to merge two rule sets: the validation and the eligibility rule sets because those were always executed in sequence in the decision points. A new rule project, loan-rules, was created and references both the validation and eligibility rules respectively contained in the validation-rules and eligibility-rules rule projects. The new "merged" rule set will be extracted from this rule project. validation-rules and eligibility rules both have a rule flow with a main flow task property set to true. A main rule flow called ilrmain is created in loan-rules and use Sub flow Tasks to references theruleflows of validation-rules and eligibility-rules. What is missing, if anything, in order to orchestrate the execution of loan-rules?

- A. Nothing is missing because Arul flow called ilrmain is always executed first.
- B. The mainruleflow name, ilrmain, needs to be specified in the code that invokes the rule set execution.
- C. The main flow task property needs to be set to true forilrmain and to false for all the other rule flows.
- D. All theruleflows that are used in the rule set need to be referenced in the rule set properties and it is possible to specify the main rule flow for the execution in these properties.

Answer: C

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
