

000-375

IBM

WebSphere Process Server V6.2, System Administration

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-375>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-375 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-375 Certification questions and answers, you will experience actual 000-375 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-375 exam. Every point from pass4sure 000-375 PDF, 000-375 review will help you take IBM 000-375 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-375 course:

- * Up-to-Date IBM 000-375 questions taken from the real exam.
- * 100% correct IBM 000-375 answers you simply can't find in other 000-375 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-375 PDF.
- * IBM 000-375 brain dump free content featuring the real 000-375 test questions.

IBM 000-375 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-375 exam training are an absolute favorite in the industry. You will pass IBM 000-375 certification test and career opportunities will be open for you.

Exam Name:	WebSphere Process Server V6.2, System Administration		
Exam Type:	IBM	Exam Code:	000-375
Certification:	IBM WebSphere	Total Questions:	107

Question: 1

A company has an IBM Web Sphere Process Server clustered environment running. A system administrator is asked to configure a LDAP people directory provider to be used by human tasks. Which action should the system administrator take?

- A. Configure the URL of the local LDAP server on all nodes within the cluster.
- B. Configure the people directory provider on the cell that contains the cluster.
- C. Configure the people directory provider on every node that hosts members of the cluster.
- D. Configure a custom property listing on the nodes within the cluster; then configure the people directory provider on the node associated with the custom property.

Answer: C

Question: 2

A developer is trying to change the settings for the Business Process Choreographer container authentication alias (BPC_Auth_Alias) that was created during the profile creation step. An error message indicating the developer does not have sufficient authority to change the settings is displayed. Which one of the following is the minimum role a system administrator should grant to the developer to correct this error?

- A. Deployer role
- B. Operator role
- C. Configuration role
- D. Administrator role
- E. Adminsecuritymanager role

Answer: C

Question: 3

A new business integration application retrieves and processes sensitive information from an Enterprise Integration System (EIS). The connection is established using a Web Sphere JCA adapter export component. To protect the target component (wired) processing the data, the system administrator plans to enable security on Web Sphere Process Server. Which action should be performed to integrate the adapter component in this environment?

- A. No action is required because the JCA adapter does not support any inbound authentication mechanisms.
- B. No action is required. In a security enabled environment all EIS connections to back-end systems are secured by default.
- C. The run-as role should be set on the target component of the adapter export to protect downstream component access.
- D. The adapter export component should be configured to use a J2C authentication alias to access the downstream components.

Answer: C

Question: 4

A company plans to use Web Sphere Business Space widgets. The development team has implemented custom widgets using the Representational State Transfer (REST) services of the Business Process Choreographer API. Security is an important aspect and all communication channels and APIs must be security enabled. Before the development team can test the installed widgets in a secured environment, which action should be performed by the system administrator?

- A. Change the communication protocol of all relevant REST service endpoints to use HTTPS.
- B. No action needs to be taken because the REST service endpoints do not support HTTPS protocols for API access.

Exam Name:	WebSphere Process Server V6.2, System Administration		
Exam Type:	IBM	Exam Code:	000-375
Certification:	IBM WebSphere	Total Questions:	107

- C. Enable administrative security and disable application security on the server or cluster hosting the REST service endpoints.
- D. Remove all HTTP port mapping from the list of virtual hosts to automatically use HTTPS ports and communication channels.

Answer: A

Question: 5

When a system administrator creates an IBM Web Sphere Process Server profile and selects Enable administrative security, an administrator user name must be supplied. This identity is used as a default for all underlying components. After the installation, which of the following components should be configured to appropriate users from the user repository?

- A. Human Task Manager
- B. Business State Machine
- C. Business Process Choreographer
- D. Common Event Infrastructure (CEI)
- E. Service component architecture (SCA)

Answer: C, D, E

Question: 6

A business process event has failed. Assuming events are enabled, how may an administrator most easily examine the end-to-end process flow that led to the failed event, working from the Failed Event Manager?

- A. From the failed event Details page, click rowse Related Common Base Events?
- B. From the failed event Details page, click pen calling process in Business Process Choreographer Explorer?
- C. Select the failed event, click submit with Trace? and view component logs.
- D. Enable tracing on the Failed Event Manager, and resubmit the original request.

Answer: A

Question: 7

A Web Sphere Process Server deployment environment is used by the development team. The Common Event Infrastructure (CEI) was configured to be on its own Derby database. The functional and recovery tests have passed the Proof of Concept (PoC). The next stage will be to conduct performance tests on a staging environment. For consistency, the production environment will use the same topology as the staging environment. Which action must the system administrator take to improve performance for the staging system?

- A. Configure CEI to use multiple Derby databases.
- B. Configure a deployment environment referencing a high performance database instead of Derby.
- C. Configure the CEI database to be on the same server as the Web Sphere Process Server db
- D. Configure the CEI database to be on the same server as the Messaging database to minimize network latency.

Answer: B

Question: 8

The Service Integration Bus Browser is a tool available from the Integrated Solutions Console (ISC) that allows the system administrator to perform which tasks?

- A. View runtime properties of messaging engines.
- B. View runtime properties of messaging engines, and modify message contents.
- C. View runtime properties of messaging engines, queue depths, and message contents.

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
