- B. Upgrade the processor to feature #2436 (1100 CPW).
- C. Upgrade the existing processor interactive feature to #1524 (240 CPW).
- D. Install the Webfacing V5R1 PRPQ to eliminate the interactive component of Webfacing.

Answer: B

Question: 7

Company.com is planning two data centers. Each data center will implement LPAR on an i810 with an OS/400 managing partition and two OS/400 secondary partitions. How many OS/400 licenses are required to support these environments?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: B

Question: 8

A business partner is developing a proposal to upgrade Company.com's installed i825. The business partner is unable to access the customer's PM/400e data on the Web. What is the most likely reason for this problem?

- A. The business partner is not at the Premier level.
- B. The business partner does not have the latest software or service pack required to query the online database.
- C. The database record may be in use, and the business partner needs to try again later.
- D. The customer has not authorized the business partner to view the data.

Answer: D

Question: 9

Company.com is installing a new LAN and wants to use TCP/IP. They intend to connect to the Internet at some time in the future. Why would they want to use Class A addresses in the range of 10.0.0.0 to 10.255.255.255 for the internal network?

- A. Class A addresses in this range can be routed to the Internet.
- B. IP addresses in this range are not used as a host IP address on the Internet.
- C. The governing body for IP addressing (InterNIC) requires internal networks use this address range.
- D. It is easier to set up IP addresses in this range and provides a wide range of options for future expansion.

Answer: B

Question: 10

A business partner wants to configure an upgrade to Company.com's i820. What can the customer do to create and transmit a file with the hardware and software configuration information to IBM?

- A. Run the Work with Order Information (WRKORDINF) command.
- B. Complete a Save Configuration (SAVCFG) to create a save file.
- C. Start Remote Support (STRRMTSPT) to allow IBM to pull the information.
- D. Use System Service Tools to work with the rack configuration and press F6.

Answer: A

Question: 11

An iSeries customer is running the WebSphere Application Server Advanced Edition, which supports the WebSphere Commerce Suite. Which of the following can the business partner use to determine the current traffic on the site?

- A. Use IBM Tivoli Web Site Analyzer to obtain the statistics.
- B. Use the iSeries Timing and Paging Statistics RPQ to analyze the site.
- C. Use performance tools data collection to collect and report the hit count statistics.
- D. The System Service Tools (SST) Task/Thread Trace feature will capture the WebSphere hit rates for analysis.

Answer: A

Question: 12
