IBM

p5 and pSeries Enterprise Technical Support AIX 5L V5.3

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=000-180>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 000-180 exam in first attempt, but also you can get a high score to acquire IBM certification.

If you use pass4sureofficial 000-180 Certification questions and answers, you will experience actual 000-180 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-180 exam. Every point from pass4sure 000-180 PDF, 000-180 review will help you take IBM 000-180 exam much easier and become IBM certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial IBM 000-180 course:

- * Up-to-Date IBM 000-180 questions taken from the real exam.
- * 100% correct IBM 000-180 answers you simply can't find in other 000-180 courses.
- * All of our tests are easy to download. Your file will be saved as a 000-180 PDF.
- * IBM 000-180 brain dump free content featuring the real 000-180 test questions.

IBM 000-180 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-180 exam training are an absolute favorite in the industry. You will pass IBM 000-180 certification test and career opportunities will be open for you.

QUESTION 1:

For the p5 590 and p5 595 servers, the HMC must be directly attached. Why is the use of a private service network between HMC and the p5 590 required?

- A. The Bulk Power Controllers are dependent upon the HMC to provide them with DHCP addresses.
- B. A firewall is required to isolate the private network from any of the open networks to which the HMC is attached.
- C. Network communications can be implemented through an open network. No private network is required but it is recommended.
- D. All p5 590 and 595 servers are shipped with one service processor card. A private network is required to manage DHCP addresses.

Answer: A

QUESTION 2:

A system administrator wants to control the HMC from their workstation. Microsoft Windows 2000 is running and the HMC graphical user interface is being used remotely. Which of the following actions will accomplish this task?

- A. Use any Windows 2000 to graphically access the HMC
- B. Load, install, and configure WebSM on the workstation
- C. Telnet to the HMC using Exceed or a GUI emulator product from the workstation
- D. Load, install, and configure OpenSSH or SSH on the workstation and access the HMC through the GUI interface

Answer: B

QUESTION 3:

Certkiller .com currently has three p650 servers in their environment and they are implementing a p5 595. The p650 servers are running in an SMP environment, but are connected to a pair of HMCs. In order to follow best practices in the enterprise server environment and maintain HMC connectivity to the p650s, what else will need to be ordered in addition to the p5 595?

- A. Include a new HMC in the order to connect to the p5 595
- B. Include a pair of new HMCs in the order to connect to the p5 595
- C. Include a media set for POWER5 HMC in the order to upgrade one of the existing HMC's to POWER5 capabilities
- D. Include a media set for POWER5 HMC in the order to upgrade both of the existing HMC to POWER5 capabilities Include a media set for POWER5 HMC in the order to upgrade both of the existing HMC? to POWER5 capabilities

Answer: B

QUESTION 4:

A system administrator is installing a p5 590 server with an HMC. After pulling the websm client down, it is not possible to connect to the HMC. The HMC can be pinged from the client. Which of the following settings should be verified next?

- A. The routes on the HMC
- B. The firewall setting of the LAN adapter
- C. The name resolution protocol on the p5 590 server
- D. The subnet mask settings on the Ethernet adapters

Answer: B

QUESTION 5:

Certkiller .com has seven days of vmstat data on four p5 590 production LPARs of four processors each. The data shows that all four LPARs have periodic utilizations of 90-95% lasting several minutes in duration. However, the average utilizations of the four LPARs were between 15-30%. The vmstat data shows that the peak utilizations of each LPAR do not occur at the same time. Which of the following should be set up?

- A. A shared pool with four capped LPARs
- B. A shared pool with four uncapped LPARs
- C. Four dedicated LPARs and use DLPAR to manage resources effectively
- D. The server in SMP mode and use WLM to manage resources effectively

Answer: B

QUESTION 6:

Certkiller .com will be using Virtual IO Server to share Ethernet adapters. What can be done to prevent network failure of the client if a Virtual IO Server goes down?

- A. Create two virtual adapters on the client, each one from a separate Virtual IO Server
- B. Enable dead gateway detection on the client so that the network traffic can be rerouted
- C. Have a spare network card on standby in the client in case the Virtual IO Server goes down
- D. Create an etherchannel adapter on the client using one Virtual Ethernet adapter from two separate Virtual IO Servers

Answer: A

QUESTION 7:

Certkiller .com has a system running AIX 5.2 and wants to upgrade to AIX 5.3. What method would provide the quickest recovery if the upgrade failed?

- A. Use alt_disk_install
- B. Backup image to NIM server
- C. Backup using mksysb to DVD-RAM
- D. Apply the upgrade and do not commit

Answer: A

QUESTION 8:

Certkiller .com has a p5 595 running 12 LPARs. They are interested in high bandwidth, secure communication between two of the LPARs within the p5 595 server. They do not have any unused Ethernet adapters. Which of the following recommendations will best meet this requirement?

- A. Utilize the integrated 10/100/1000 network interface
- B. Implement Virtual Ethernet to enable inter-partition communication
- C. Implement shared Ethernet with the Ethernet adapters utilized in the other LPARs
- D. Implement a Point to Point protocol serial communication between the p5 595 serial ports

Answer: B

QUESTION 9:

When doing the Solution Assurance for a p5 570 with several LPARs, it is discovered that the customer plans to back the system up using mksysb. The customer would like to do unattended automated system backups and incorporate them into their off-site data recovery system. Which mksysb solution should be implemented?

- A. A local DVD-ROM drive
- B. A NFS mount on a NIM Master
- C. A SSA disk array and mirror the data
- D. A local tape drive and use DLPAR to move the tape to each LPAR

Answer: B

QUESTION 10:

Service Focal Point, Inventory Scout, and DLPAR rely on correct setup and networking between the HMC and the logical partitions. Which authentication method is used to control session management, but also authentication between network peers?

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
